## Parking Lot Traffic Flow Pattern

HAMILTON, OH: The Butler County Board of Elections has implemented a new permanent traffic flow pattern while entering and exiting the main parking lot and overflow parking. Directional signs and markings will be present to assist voters on the first day of early voting, which begins on October 8, 2024.

“While working with the Butler County Board of Commissioners and County Maintenance Department, it was determined that eliminating cross traffic through the main parking lot, adding crosswalks, and additional signage would be necessary for voter safety and best serve voters while visiting our office, especially during the early voting period of each election,” said Director Nicole Unzicker. See the attached layout of the new traffic flow pattern for onsite parking.

## Updated Parking Lot Directions Effective February 21, 2024
